CONTENTS

SECTION 1	INTRODUCTION AND TARGETS	PAGE 3
SECTION 2	JOINTS PROBLEM	PAGE 4
SECTION 3	COMBINATORIAL NULLSTELLENSATZ	PAGE 4
3.1	Chevally-Waring Theorem	4
SECTION 4	SUM SETS	PAGE 4
4.1	Sum Sets over Finite Fields	4
4.1.1	Cauchy-Davenport Theorem	4
4.2	Restricted Sum Sets	4
4.2.1	Erdős-Heilbronn Conjecture	4
SECTION 5	ARITHMETIC PROGRESSION FREE SETS IN \mathbb{F}_3^n	PAGE 4
5.1	3AP Free sets in \mathbb{F}_q	4
SECTION 6	3-TENSORS AND SLICE RANK	PAGE 4
6.1	Rank	4
6.2	Generalization to 3-Dimension	4
6.3	Slice Rank of Diagonal 3D Tensor	4
SECTION 7	KAKEYA AND NIKODYM PROBLEM	PAGE 4
7.1	Lower Bound on Nikodym Sets	4
7.2	Lower Bound on Kakeya Sets	4
7.2.1	Hasse Derivative	4

1 Introduction and Targets

The content of this course will be the followings:

- Polynomial Methods in Combinatorics/Geometry
 1. Kakeya/Nikodym Problem over finite fields
 2. Joints Problem
 3. Combinatorial Nullstellensatz (CN)
 4. CN proof of Cauchy-Devenport, Erdős-Heilbronn Conjecture
- Polynomial Methods in Algebraic Algorithms
 1. Noisy Polynomial Interpolation (Sudan, Guruswami-Sudan)
 2. Multiplicative noise (Von zur Gathen-Shparlinski)
 3. Coppersmith's Problem (Given an univariate $f(x) \in \mathbb{Z}[x]$, compute all 'small' integer roots modulo a composite)
- Polynomial Methods in Circuit Complexity
 1. Razborov-Smolensky (Lower Bound for constant depth AND, OR, NOT, $\text{mod } p$ gates)
 2. Algorithmic consequences (all pairs shortest paths)
 3. Upper bounds on matrix rigidity (Alman-Williams '2015, Dvir-Edelman '2017)
- Polynomial in Property Testing: Polischuk-Speilman Lemma/Variants
- Weil Bounds (Stepanov, Schmidt Bombieri)
- Rational Approximations of Algebraic Numbers (Thue[1907] - Siegel - Roth[1954])

2 Joints Problem

3 Combinatorial Nullstellensatz

3.1 Chevally-Waring Theorem

4 Sum Sets

4.1 Sum Sets over Finite Fields

4.1.1 Cauchy-Davenport Theorem

4.2 Restricted Sum Sets

4.2.1 Erdős-Heilbronn Conjecture

5 Arithmetic Progression Free Sets in \mathbb{F}_3^n

5.1 3AP Free sets in \mathbb{F}_q

6 3-Tensors and Slice Rank

6.1 Rank

6.2 Generalization to 3-Dimension

6.3 Slice Rank of Diagonal 3D Tensor

7 Kakeya and Nikodym Problem

7.1 Lower Bound on Nikodym Sets

7.2 Lower Bound on Kakeya Sets

7.2.1 Hasse Derivative
